http://mementoweb.org   #memento

Motivation

- Extensive Memento infrastructure exists
    - Compliant archives (Internet Archive, UK web archive, archive.today, etc)
    - Proxies for non-compliant systems
    - Memento for MediaWiki systems
    - Memento aggregator
- Client needed to see it all work (Memento for Chrome, mcurl)
- To increase visibility of Memento and its infrastructure
    - → develop web-based services

Georgetown (Washington, D.C.)

From Wikipedia, the free encyclopedia

Coordinates: 🌐 38°54′34″N 77°3′54″W

This is an **old revision** of this page, as edited by **Luckas-bot** (**talk** | **contribs**) at 19:52, 17 July 2011 *(r2.7.1) (robot Adding:* **simple:Georgetown, Washington, D.C.**). It may differ significantly from the **current revision.**

Georgetown is a neighborhood located in the Northwest quadrant of Washington, D.C., along the Potomac River waterfront. Founded in 1751, the city of Georgetown substantially predated the establishment of the city of Washington and the District of Columbia. Georgetown retained its separate municipal status until 1871, when its city charter was revoked by the United States Congress. A separate law in 1895 specifically repealed Georgetown's remaining local ordinances and renamed Georgetown's streets to conform with those in the city of Washington. Today, the primary commercial corridors of Georgetown are M Street and Wisconsin Avenue, which contain high-end shops, bars, and restaurants. Georgetown is home to the main campus of Georgetown University and numerous landmarks, such as the Old Stone House, the oldest standing building in Washington. The embassies of France, Mongolia, Sweden, Thailand, and Ukraine are located in Georgetown.

Georgetown Historic District

U.S. National Register of Historic Places

U.S. National Historic Landmark District

Former Riggs Bank building located at the intersection of M Street and Wisconsin Avenue, NW

Location   Roughly bounded by Whitehaven Street, Rock Creek Park, the Potomac River, and the Georgetown University campus

Memento Experiment

Experiment conducted in the course of September and October 2009 by:

Los Alamos National Laboratory, Research Library, Prototyping Team: Lyudmila Balakireva, Robert Sanderson, Harihar Shankar, Herbert Van de Sompel

Old Dominion University, Computer Science Department: Scott Ainsworth, Michael Nelson

Herbert Van de Sompel

Michael Nelson

The Memento project researches new ideas related to Web Archiving, focusing on the integration of Web Archives in regular Web navigation.

This Memento experiment is supported by the Library of Congress under the National Digital Information Infrastructure and Preservation Program. Visit the Digital Preservation site for more information about the Program.
