Federal Interagency Coordinating Committee on Digital Cartography (FICCCDC)

- First Chartered in April 1983 by OMB
  - Chaired by the National Mapping Division of USGS
- Focus creation of digital cartographic data into a National Database
- Focus on Digital Data
- FGDC grew out of FICCCDC
Federal Geographic Data Committee (FGDC)

- Created by revision to OMB Circular A-16 in 1990 (Chaired by DOI)
- Coordination of surveying, mapping and spatial data
- Development of national information resource
National Spatial Data Infrastructure (NSDI)

- Executive Order 12906
- FGDC assigned to Coordinate the Federal Government’s Development of NSDI (Chair DOI Secretary)
  - Clearinghouse
  - Standards
  - Framework
  - Partnerships
National Spatial Data Infrastructure (NSDI)

The vision of the NSDI: to assure that spatial data from multiple sources (Federal, State, and local governments, academia, and the private sector) are widely available and easily integrated to enhance knowledge and understanding of our physical and cultural world.
Spatial data is born digital

</table>
Executive orders

- Avoid duplication of work and improve the standardization of maps (1906)
- A central information office that was to furnish all map and survey data information within the government as well as from other sources (1919)
- Invite the “map using public” to meetings for “conference and advice” (1919). Board created an Advisory Committee
Conclusion

- Technology has changed: Born Digital
- Spatial Data Issues: Remain Similar

Note: Division of Maps, Library of Congress, was a Member of the Board on Surveys and Maps
