

Next Generation Archive Management

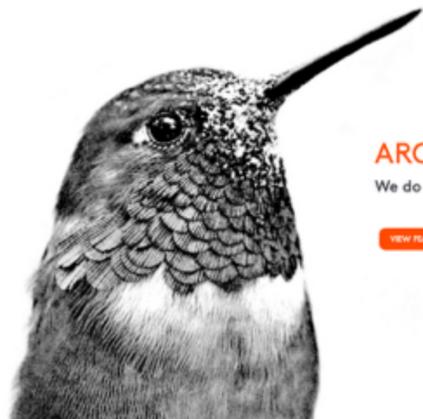

Harriet Coverston

Versity Software

The only independent large scale data archiving software company

ARCHIVING IS OUR FOCUS.

We do one thing, and we do it well.

[VIEW FEATURES](#)

[BUY](#)

Versity Storage Software Beliefs

- The value is in the software
- Open source beats closed - especially for archives
- Deployment on commodity hardware
- Scale out architectures
- Spectacular support

What we do

- 1. Store and protect very large data collections**
- 2. Execute optimized large read / write workloads**
- 3. Ensure data resides on diverse systems and media**

Why is Versity different ?

- Subscription business model
- No minimum contractual term
- Perpetual free ability to read your data
- Open source data formats
- Investing in new technology
- Excellent "direct" customer support

What problems are we solving

1. Enable file applications to use object storage
2. Accelerate object storage system performance
3. Unify object storage, cloud, and tape systems

1. Enable

POSIX

Object & POSIX

Enable

OBJECT

Cloud  Enterprise

Private Cloud

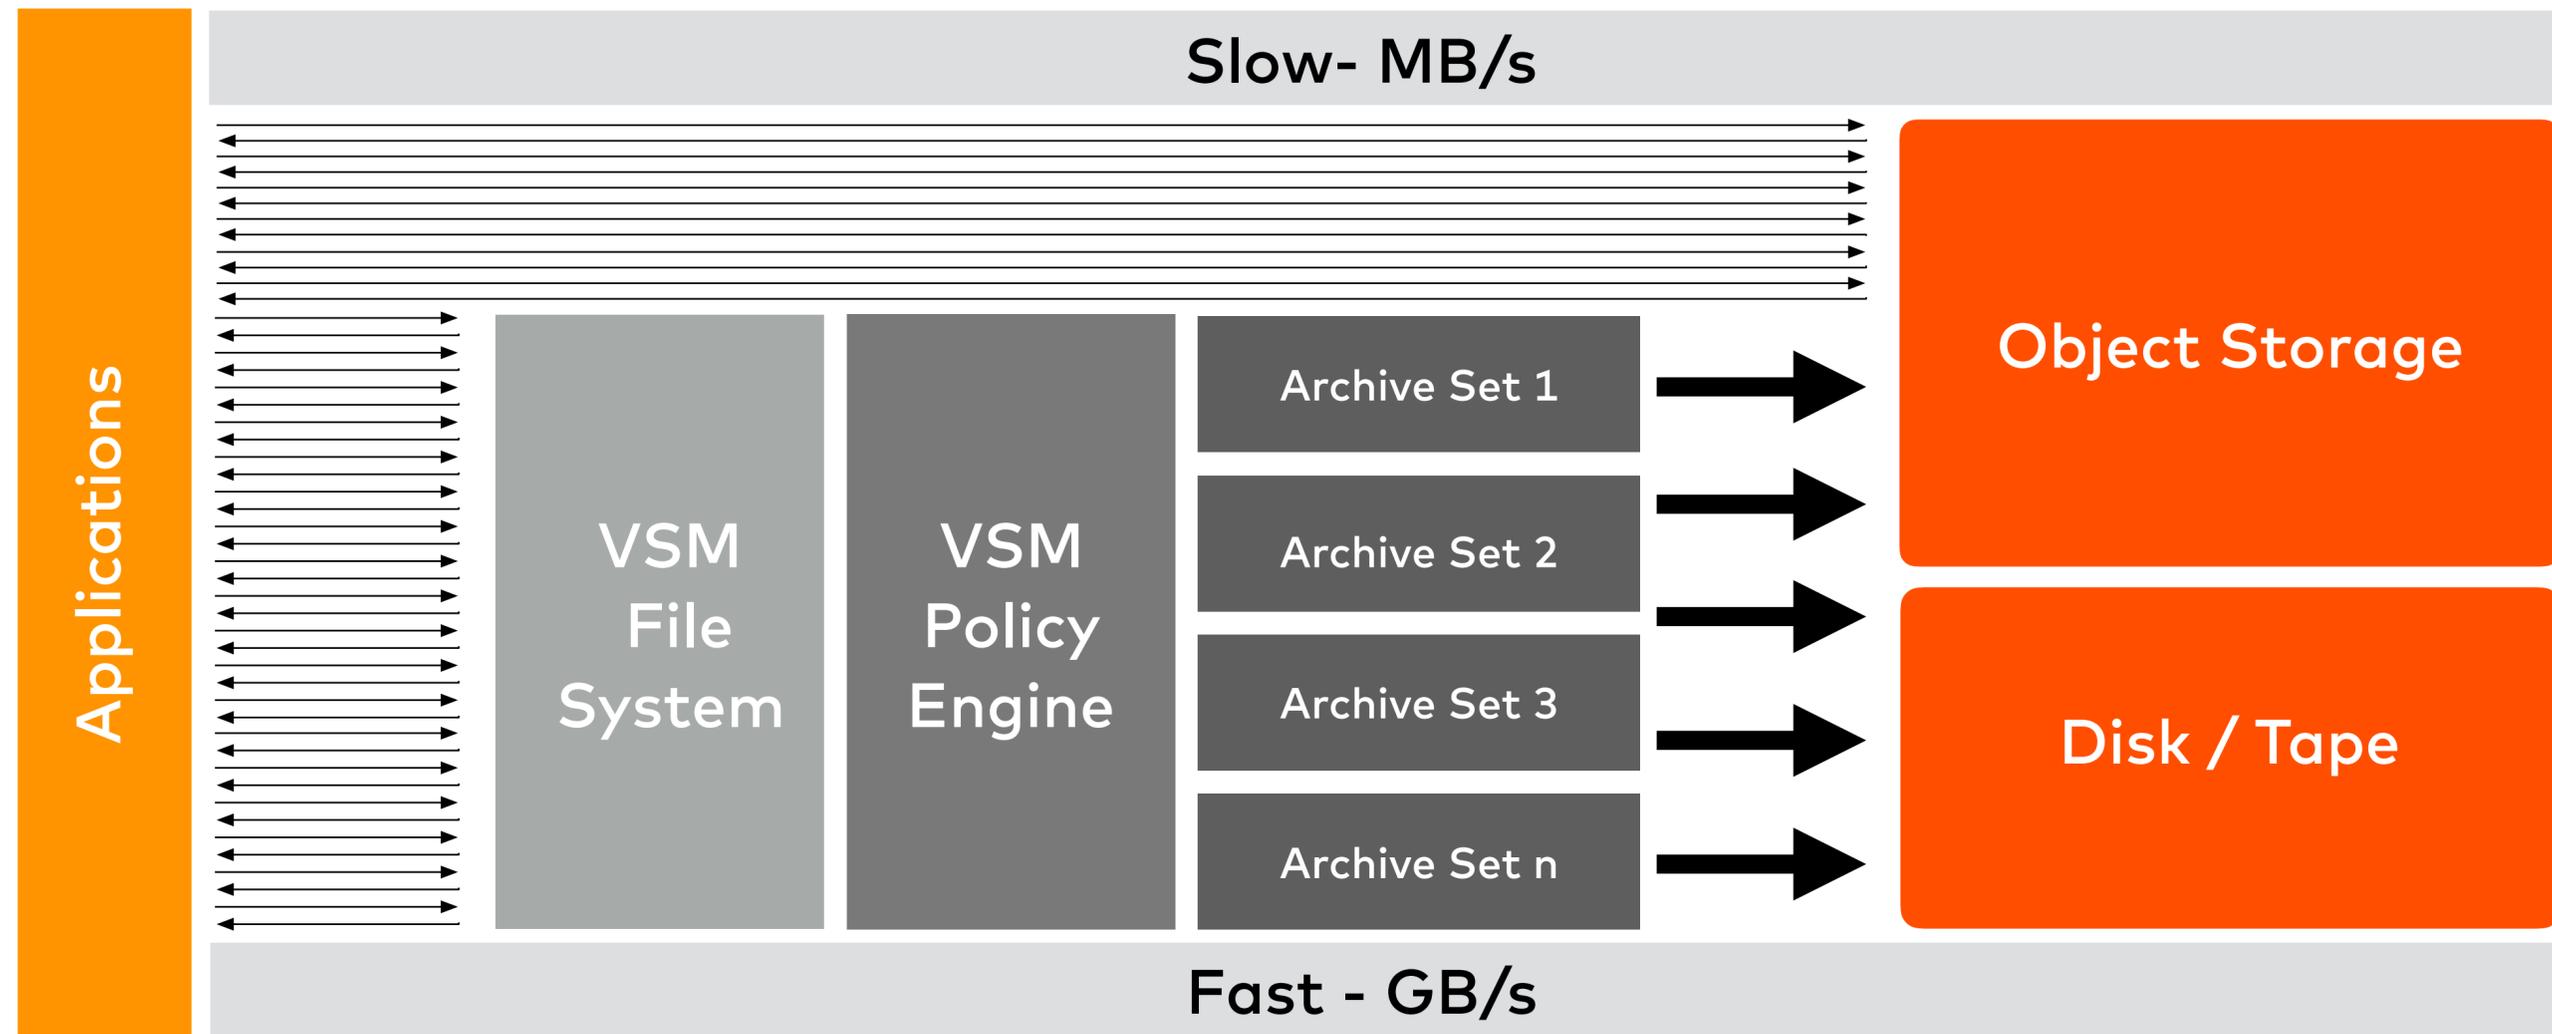

Disk Systems

Tape

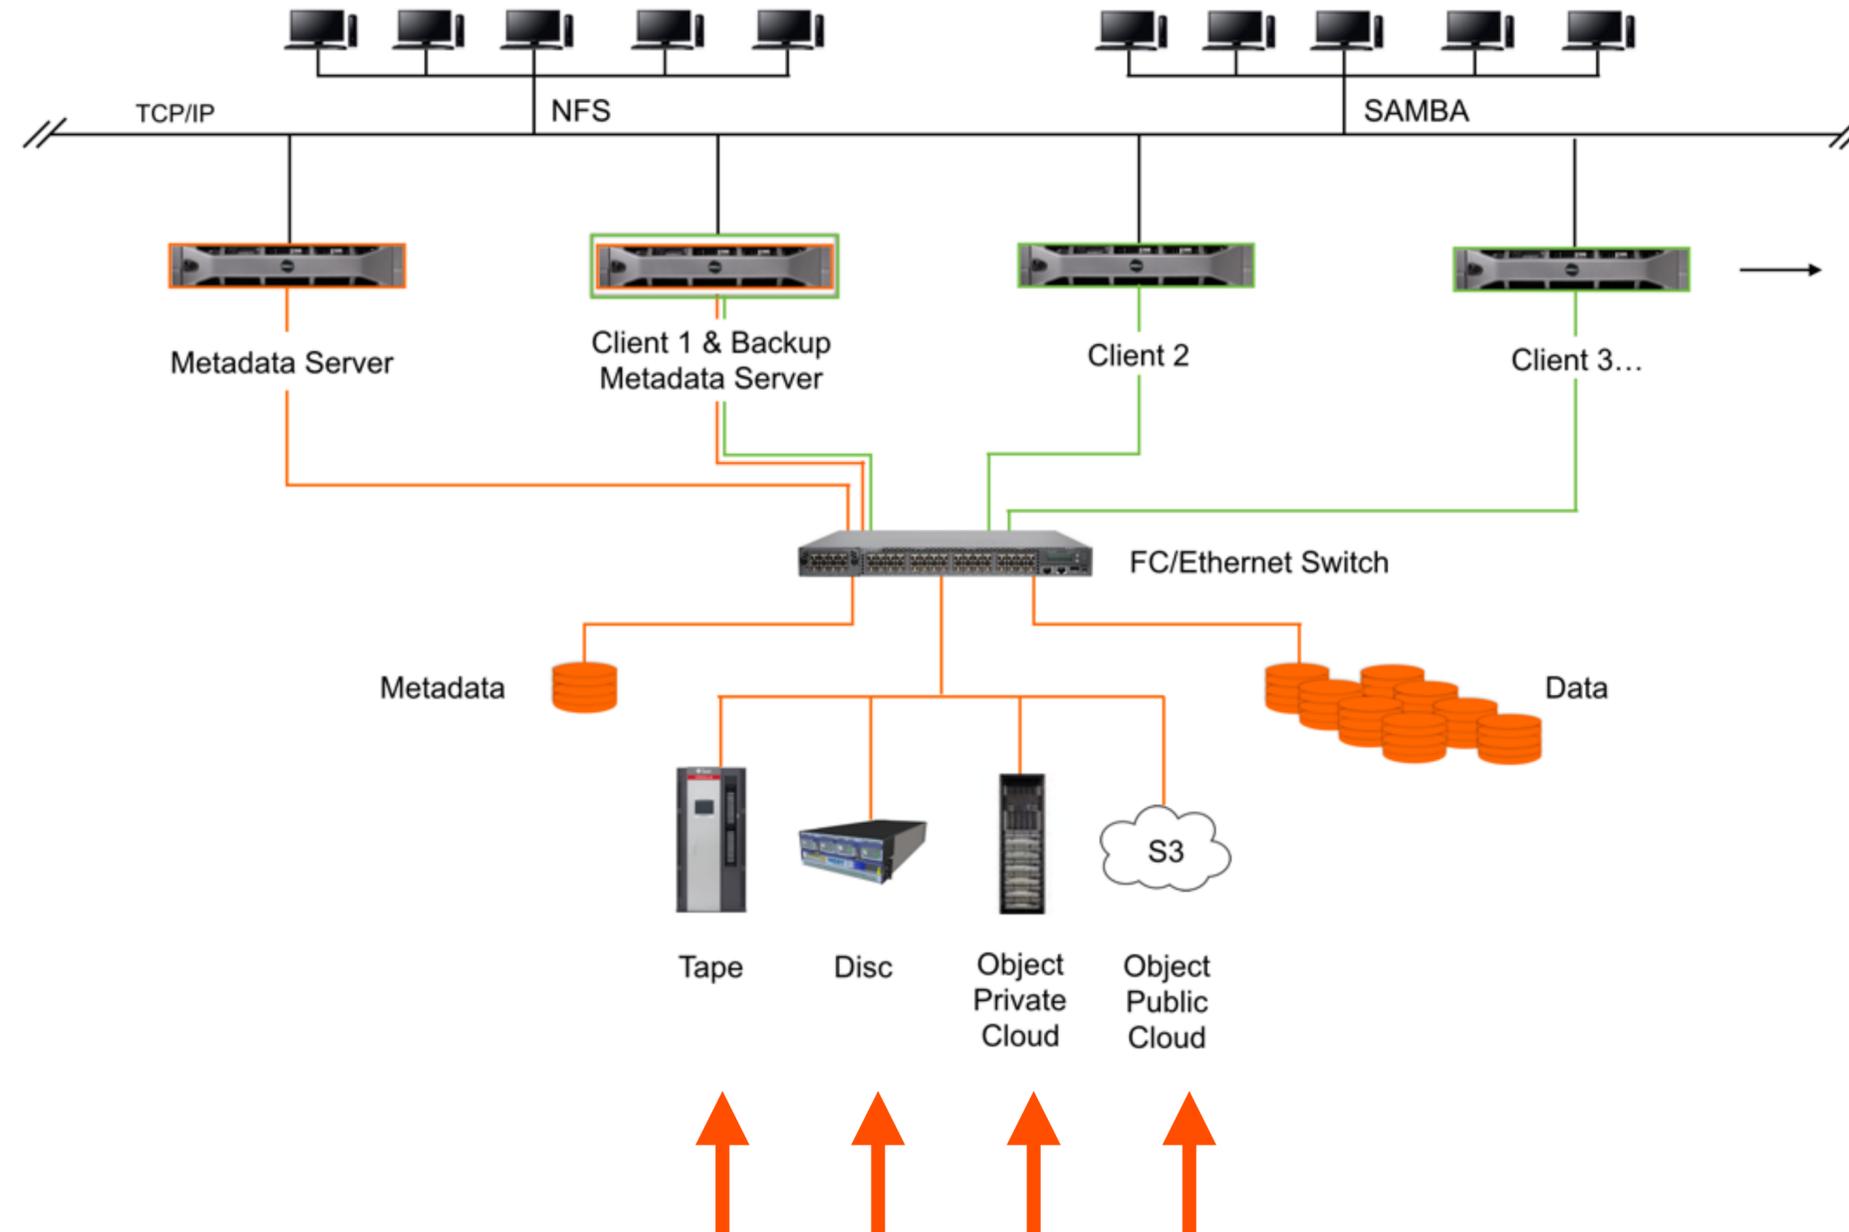

2. Accelerate

3. Unify

File + Block + Object

VSM Object Integrations

(more coming...)

VSM Object Capability

- In use at Ovation Data Systems in Houston Texas
- Archiving, staging, and recycling
- 1.8 GB/s archiving
- 2.0+ GB/s staging

Initial cloud deployment

- Partial tape replacement use case plus NAS replacement
- Private cloud provider for Oil & Gas and M&E customers
- Considers the joint solution "best of all possible worlds"

New Technology

- Open source GPL Linux scalable POSIX file system
- Global namespace with 1T files, 1B files per directory
- Next generation scale out archive application
