

Software Preservation Network  
The Access Breakdown and  
System Level Change

ADE Summit, Library of Congress  
November 16, 2017

PART I:  
Software is Infrastructure

<http://archiveofaffinities.tumblr.com/post/107510138416/giorgio-de-chirico-the-great-automaton-1925#notes>

Software is  
EMBEDDED

Software is  
TRANSPARENT

SHAPE  
ANEW  
WORLD  
AROUND  
YOU.

Software has  
REACH AND  
SCOPE

Software is  
LEARNED AS  
PART OF A  
MEMBERSHIP

<http://archiveofaffinities.tumblr.com/post/20598063156/roy-licthenstein-pyramids-iii-1969#notes>

Software  
EMBODIES  
STANDARDS

Software is  
**BUILT ON AN  
INSTALLED BASE**

Software is  
FIXED IN  
MODULAR  
INCREMENTS

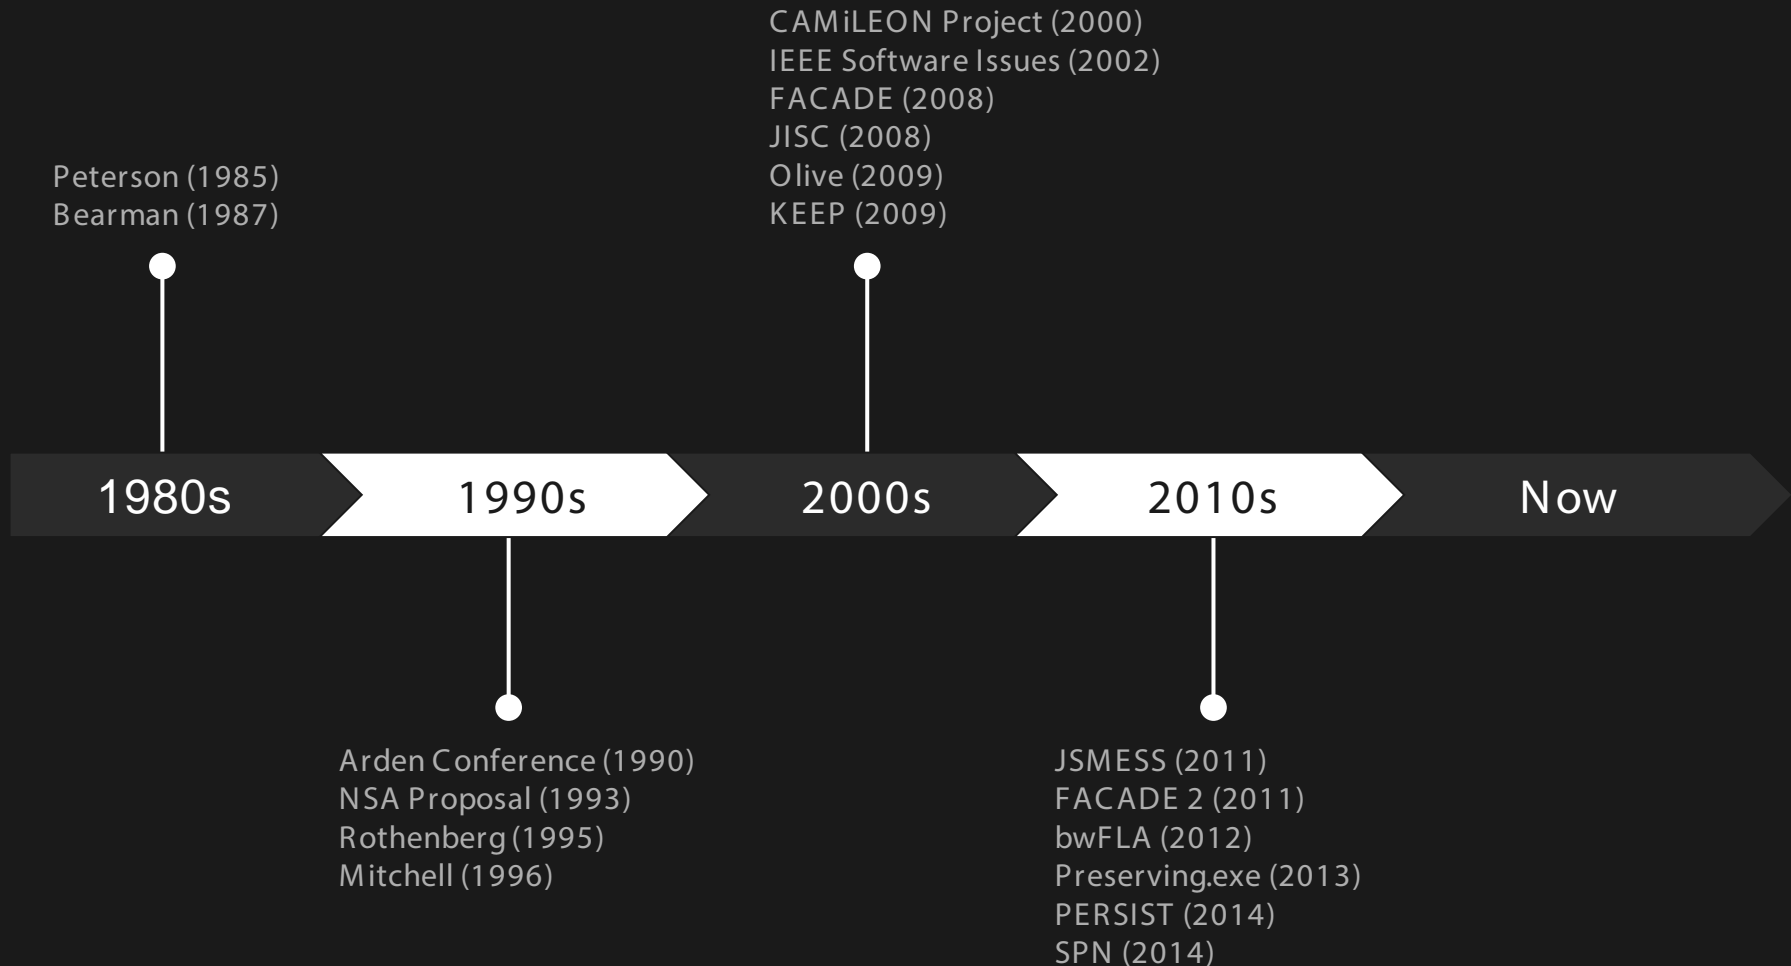

# Software is VISIBLE ON BREAKDOWN

## PART II: The Access Breakdown

Our cultural record is increasingly made up of complex digital objects.

The Access Breakdown  
necessitates system level change  
that acknowledges that  
software is infrastructure.

# PART III: System Level Change

System level change means  
working outside the  
conventions of your  
community of practice.

Collective Impact is a model  
for understanding system level change.

# Collective Impact:

A common agenda

Shared measurement/data

Mutually reinforcing activities

Constant communication

Lightweight backbone

The Software Preservation Network is a backbone organization that supports a Collective Impact approach to software preservation.

*community engagement*
