

Working in partnership to archive and preserve our digital scholarship

CHRONOPOLIS

**DURACLOUD™**

DPN

Who is this alphabet soup?

- **Chronopolis**- dark archiving, trusted digital repository service offered by UC San Diego
- **DuraCloud**-Open source software for archival cloud storage and preservation services run by DuraSpace
- **DPN**-Project to create a National Digital Preservation Network for preserving our scholarship

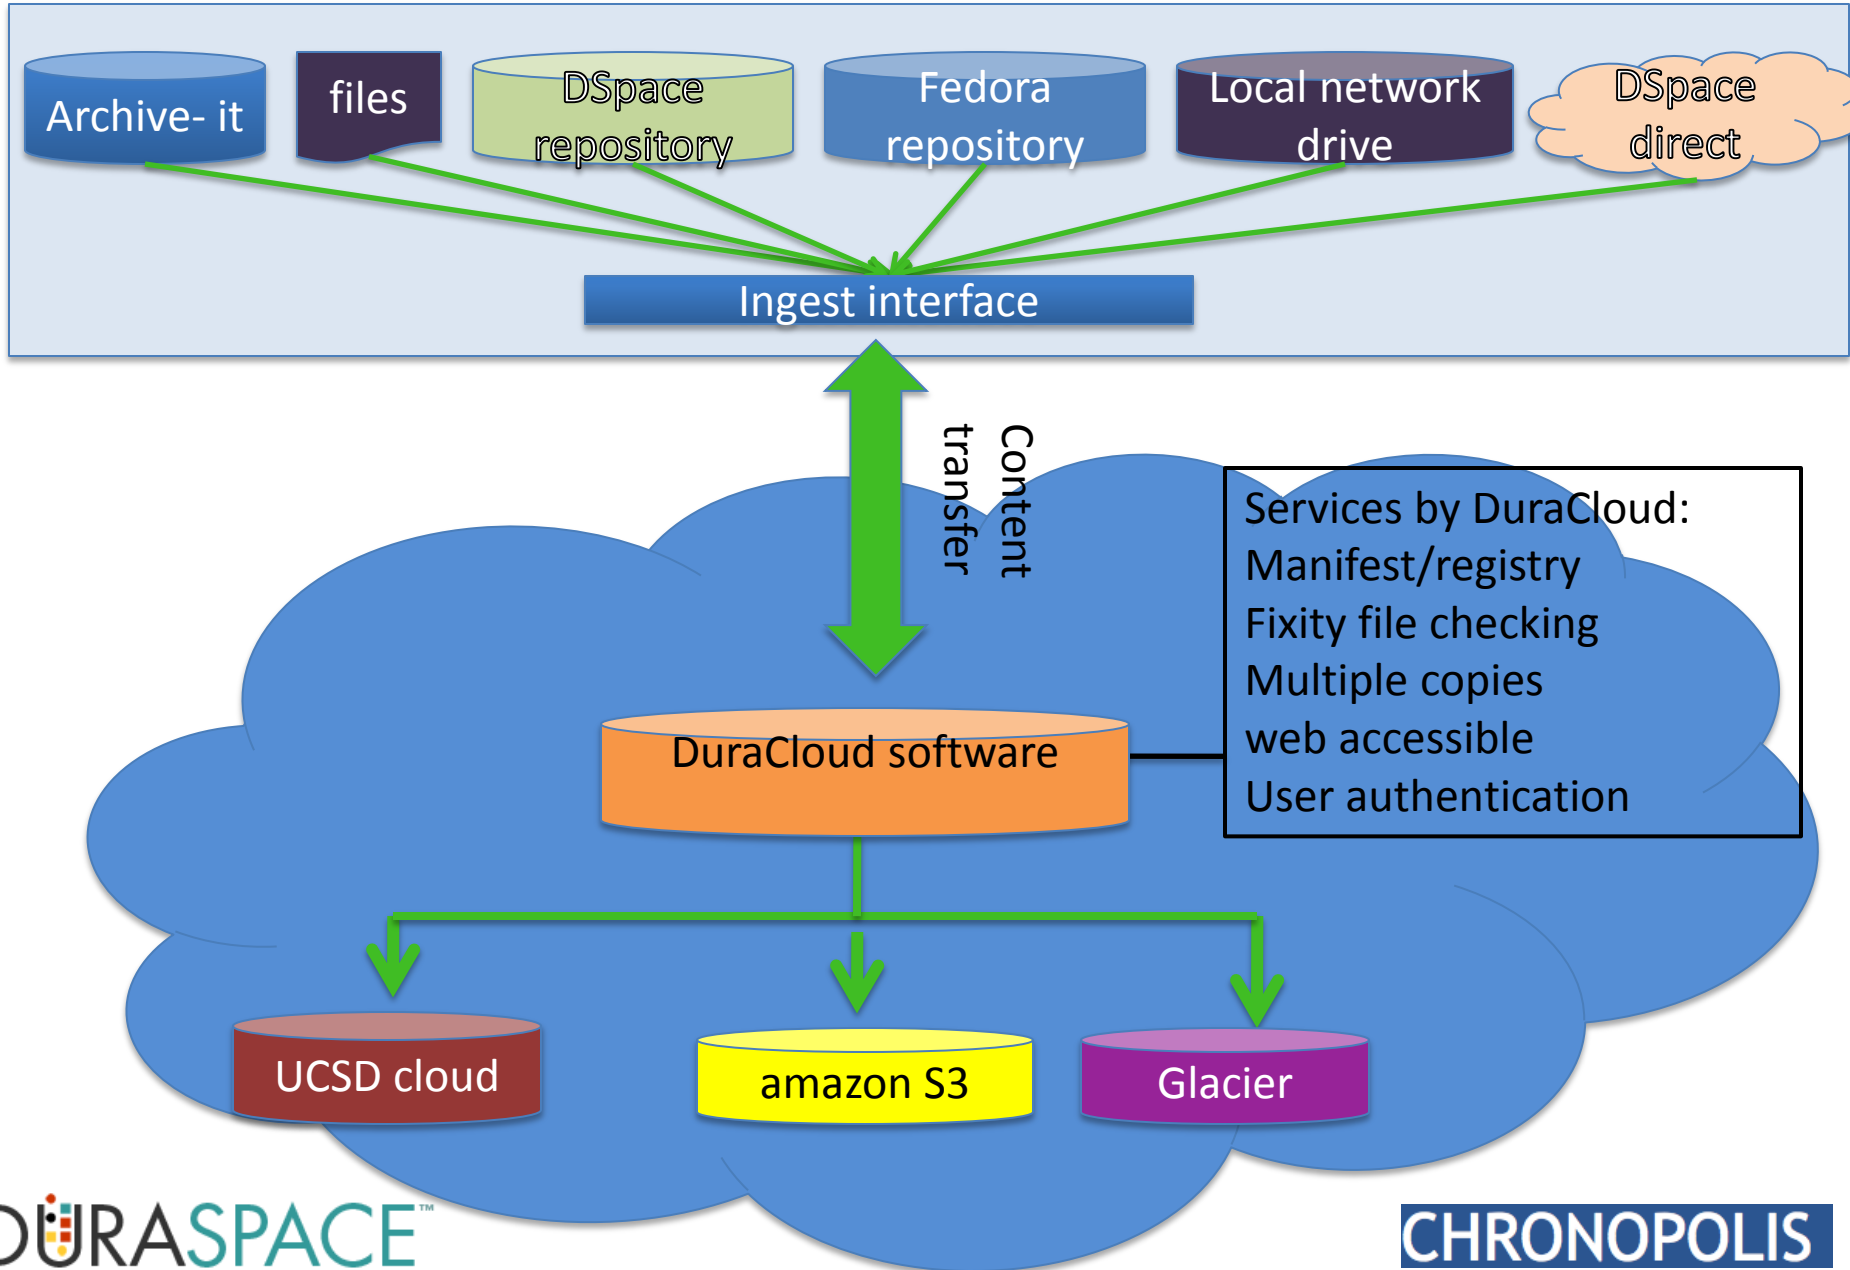

Why would we partner?

To create a comprehensive, open source solution for preserving our digital content

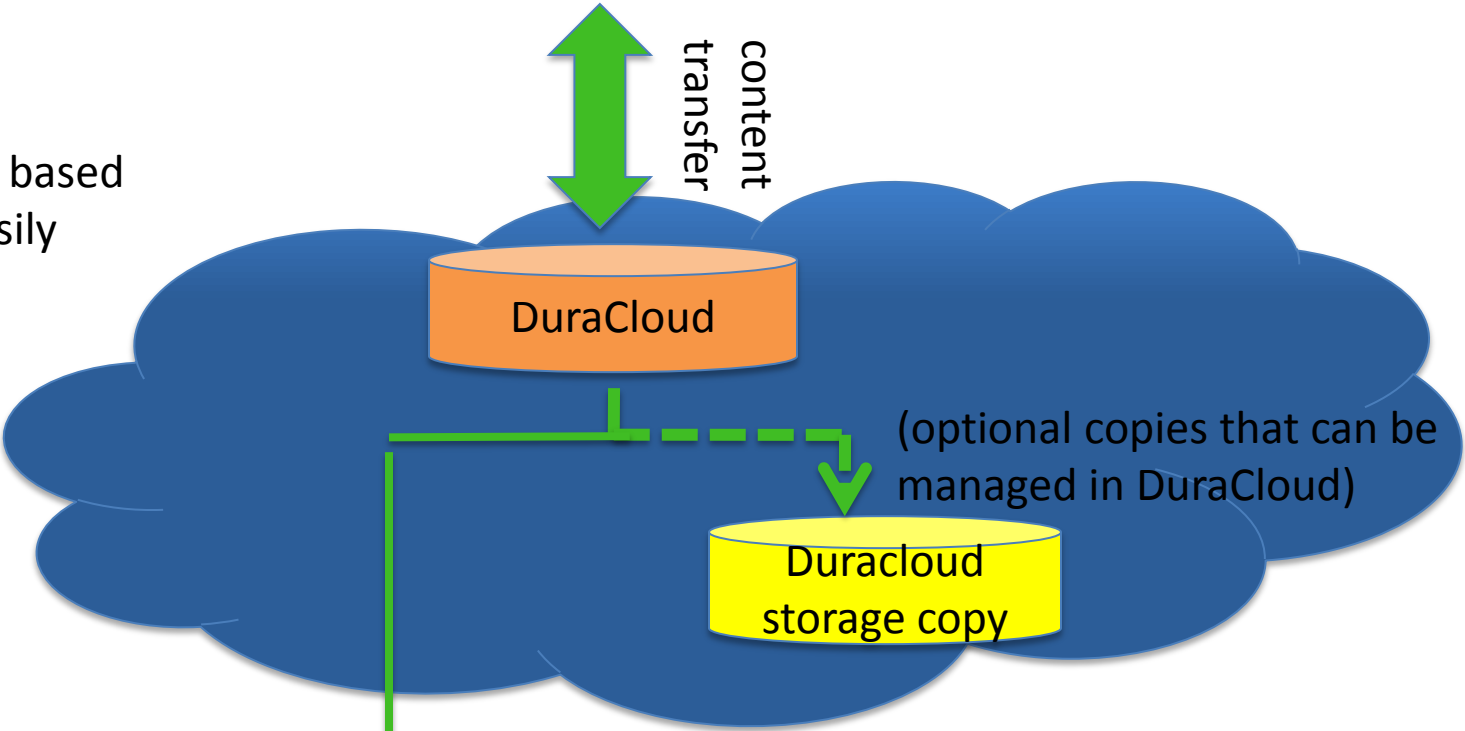

**Created by our community, for our
community**

What is this preservation solution?

How does it get into the Preservation Network?

Light cloud based archive, easily accessible

Dark Archive, distributed into DPN, minimum of 3 copies and 3 Institutions

Why may you care?

Open source +

Built by the community for the community

= Long term sustainability

Currently five DPN nodes building the network

- DuraCloud/Chronopolis
- Hathitrust
- Stanford Digital Repository
- APTrust
- University of Texas

Goal is to accept content into system in mid 2015
